### **DETAILED ACTION**

This Office Action is in response to a communication made on April 27, 2006.

Claims 4 and 17-23 have been cancelled.

Claims 1-3, 6, and 9-16 have been amended.

Claims 1-3, 5-16, and 24-31 are pending in the application.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, and 5-16, drawn to logging real time measurement data and sending them to a trender application for processing, classified in class 709, subclass 219.
- II. Claims 24-31, drawn to receiving and modifying stored measurement data in a shared memory, classified in class 709, subclass 213.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as sending measurement data to a different application in order to be displayed to a user. See MPEP § 806.05(d).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
